PREPARATION OF THIS STATEMENT7

Kinto General

Statement of conformity

At [Kinto AUSTRIA] we are committed to ensuring digital accessibility in accordance with the Act of 17 April 2019 on the accessibility of websites and mobile applications of private and commercial organizations

This accessibility statement applies to:

- Website:

Please note that this statement does not cover other content or websites published on any of the subdomains or services of third-party vendors. These websites and their content or services have their own specific accessibility statements.

Compliance status

The components and templates used across KINTO's websites have undergone an external accessibility audit, including both automated and manual checks. This was done to ensure they meet the [Web Content Accessibility Guidelines \(WCAG\) 2.1](#), Level AA.

The main components and templates are partially compliant. For 23 criteria they are compliant, 23 criteria are not compliant and 4 criteria are not present.

These components and templates were last tested in April 2024.

Please note that as of now [KINTO AUSTRIA], has not been individually tested for accessibility. We are in the process of scheduling and conducting these tests to ensure the local implementation also meets our accessibility standards.

Compatibility with browsers and assistive technology

The main components and templates are designed to be compatible with the following ~~most used~~ assistive technologies:

Operating systems and browsers:

- Chrome version 123.0.6312.107
- Edge version: 121.0.2420.81
- Firefox version: 123.0
- Safari version: 17.1
- Windows version: Windows 11 Pro
- MacOS version: Sonoma 14.1.1
- Android version: Android 13
- iOS version: iOS 17.1

Screen readers:

- NVDA version 2023.10
- VoiceOver
- Talkback

Technical specifications

The accessibility of the main components and templates rely on the following technologies to work with the particular combination of web browser and any assistive technologies or plugins installed on your computer:

- JavaScript
- WAI-ARIA
- CSS
- HTML

Non-accessible content

The most important issues that are present within the main components and templates are listed below.

- 1) Text alternatives and labels are incorrect or missing entirely
- 2) The focus state is not visible at all times
- 3) The link text is ambiguous or does not describe the purpose of the link
- 4) There are missing or incorrect (ARIA) roles and attributes or these elements are incorrectly used
- 5) Text is not 200% scalable without loss of information or functionality

Other inaccessible parts, that are less common, were documented during the accessibility audit for the main components and templates.

Suggested alternatives

[KINTO AUSTRIA] is dedicated to resolve accessibility issues. If you encounter any barriers while using our website, please let us know so we can address them.

Exemptions

None

Contact details

If you have any questions or comments about the accessibility of our website/application, please contact :

[KINTO AUSTRIA]

Mail: kontakt.at@toyota-fs.com

Telephone: +43 (0) 5052142 - 000

If the above service does not respond, please contact the following control body:

Improvement plan

Kinto AUSTRIA remains committed to improving the accessibility of the website in the near future. With the help of the accessibility audit, the website is being systematically improved.

In the near future Kinto AUSTRIA commits to perform an in-depth audit of the website. Next to the analysis of the main components and templates, this will provide a complete overview of the accessibility state of the entire website.

Preparation of this statement

This statement was prepared in June 2025

The statement was last revised in June 2025
